Check Out What Others Are Saying... "This is by far the most well rounded free diving book I've ever read. I practiced for many years and then took some time off. I was really looking for a refresher course prior to a long overdue abalone dive. I really thought I knew it all from having so many years under my belt; I was wrong. I didn't know how much I still had to learn. I practiced the exercises in the book for about a week before my dive. I was nearly where I left off from my last dive years prior and within a month I plan to be on my A-game. Thanks to the author for providing such a detailed guide, it's opened up a whole new perspective on the sport that I grew up with! " - GrumpysGifts (USA) "This guide is one of

the best written and detailed books on diving out there. For my personally holding my breath underwater was as hard as actual swimming so when I saw that there is a full chapter on how to master it, I knew I have to take this book. All the other tutorials and safety measures are well written so I am sure it will save a lot of lives. I recommend this book to anyone passionate about freediving. Five star for me !" - Vlad Buculei (Brno, Czech Republic)

Army Field Manual FM 22-100 (the U. S. Army Leadership Field Manual) May 20 2023 This edition of the US Army Leadership Field Manual (FM 22-100) establishes a unified leadership theory for all Army leaders based on the Army leadership framework and three leadership levels. Specifically, it- Defines and discusses Army values and leader attributes. Discusses character-based leadership. Establishes leader attributes as part of character. Focuses on improving people and organizations for the long term. Outlines three levels of leadership-direct, organizational, and strategic. Identifies four skill domains that apply at all levels. Specifies leadership actions for each level. The Army leadership framework brings together many existing leadership concepts by establishing leadership dimensions and showing how they relate to each other. Solidly based on BE, KNOW, DO-that is character, competence, and action-the Army leadership framework provides a single instrument for leader development. Individuals can use it for self-development. Leaders can use it to develop subordinates. Commanders can use it to focus their programs. By establishing leadership dimensions grouped under the skill domains of values, attributes, skills, and actions, the Army leadership framework provides a simple way to think about and discuss leadership. The Army is a values-based institution. This field manual establishes and clarifies those values. Army leaders must set high standards, lead by example, do what is legally and morally right, and influence other people to do the same. They must establish and sustain a climate that ensures people are treated with dignity and respect and create an environment in which people are challenged and motivated to be all they can be. This field manual discusses these aspects of leadership and how they contribute to developing leaders of character and competence.
