Ex-CIA covert operator Martin Dallas has never failed a mission, not in the jungles of Cambodia or the deserts of the Middle East. After Wahhabi terrorists murder his wife, Dallas leads an elite mercenary team in a decisive covert op designed to end terrorism. Financed by an American industrialist, Dallas secures suitcase nukes for his mission and prepares to strike at the heart of radical Islamic terrorists. At the same time,

the CIA and a SEAL team have only hours to save tens of thousands of Americans from dying in a nuclear inferno triggered by suicide bombers who have already penetrated U.S. waters. While tracking the nuclear-armed terrorists and deploying the first of his weapons Dallas slides back into nasty habits like kidnapping, torture, and murder. When it's time to detonate his first bomb, he realizes he's progressively losing his humanity and is becoming what he seeks to destroy. As Mossad and the CIA close in on him and his bomb, Dallas must quickly decide whether he'll incinerate thousands of civilians or salvage his soul by allowing his mission to fail.

Ride the wave of hope with Ricochet – the only SURFice dog™ in the world who chose her own purpose! She surfs with children with special needs, people with disabilities, wounded warriors, and veterans with PTSD as an assistive aid and intuitive muse, healing hearts and souls on every wave. This tears-to-triumph story takes readers behind the TV and video sensation and shares the true journey that went from promise to disappointment before ultimately finding life's purpose. The gorgeous golden retriever Ricochet seemed destined to be a service dog from the moment she was born. She approached her training with boundless energy and surpassed every other dog in her Puppy Prodigy training class. Unfortunately, her love for chasing birds could prove dangerous, for those she would assist. Fifteen months into her training, Ricochet was released, leaving a frustrated owner and a dog without a direction. Yet through a twist of fate, Judy realized that flunking out of school wasn't the end of the world—and in fact, could be the beginning of a new one. Once Judy learned to let go and let Ricochet be who she really was, they found her true calling as a SURFice dog. Ricochet's story is one of synchronicity, our interconnectedness, and opening ourselves to life's 'paws'ibilities. Embracing her true calling, Ricochet began to help others, including those with traumatic brain injuries, post-traumatic stress, and physical disabilities, raising hundreds of thousands of dollars for charitable causes and inspiring people to believe in themselves. Ricochet does more than steady the board: she offers hope, comfort, healing, and a reason to keep fighting. What gives this story such extraordinary potential to become a publishing sensation? Ricochet is the only SURFice dog in the world, there is no other story quite like it! Made up of members of the Coldstream and Scots Guards, British Yeomanry cavalry regiments, New Zealanders, South Africans, and Indian Army men, the Long Range Desert Group was perhaps the most

effective of all the "special forces" established by the Allies during the Second World War. It was able to go thousands of miles into enemy territory, well-armed and carrying its own supplies of petrol, food and even water to last for weeks at a time - something quite new in military history. Using experience acquired in WWI and inter-war exploration travels, the LRDG thus developed the ability to appear almost anywhere in the desert to carry out almost every type of ground reconnaissance mission possible in desert warfare, exploring and mapping the terrain, transporting agents behind enemy lines or determining the strength and location of enemy forces with an extraordinary degree of accuracy and detail and thus able to verify or hide Ultra intelligence. Equally important were their skills in the art of desert navigation, demonstrated in the outflanking of the enemy during the Allied advance from El Alamein westward to Tunisia, as led by the LRDG. Once it had teamed up with the Special Air Service (SAS), made up of British, Free French, Commonwealth and Jewish Palestinian soldiers, the LRDG perfected the art of irregular mechanized warfare conducted in the rear of the enemy's forces in the desert, attacking enemy installations of all kinds, mining roads, raiding airfields, destroying enemy aircraft on the ground and inflicting losses upon the enemy in inverse proportion to their own remarkably low rate of casualties. Through meticulous research in original archival material, this book thus tells the extraordinary story of how a relatively small number of dedicated men developed the methods and techniques for crossing by motor vehicle the depths of the then unmapped and seemingly impassable great deserts of Egypt and Libya, the Western Desert, during the British Army's North African Campaign of 1940-43. The Long Range Desert Group and the Special Air Service as a matter of course did extraordinary things - the heroic was the commonplace. Their tactics, techniques and remarkable success in desert warfare continue to make them of great interest to the student of military affairs. Likewise, as it

seeks to answer how the deep desert can best be used for military purposes, this study is pertinent to today's military operations, perhaps more so than at any time since World War II. "...this study provides fresh insights into the nature of desert warfare, past, present and future... [and] reveals the peculiarities of this warfare often lost to modern armies... a virtual primer, useful to commanders and soldiers alike. At long last this book can find its rightful place in the classroom of military courses and colleges and in the hands of those interested in the intricacies, complexities and problems of military operations in desert regions". From the Foreword to the book by Colonel (Retired) David M. Glantz. The present rate of devastation of our natural world and of healthy lives is unprecedented, and accelerating. The work of conserving land, species, and ways of life is more urgent and vital than ever before. What does it mean to truly conserve land and community life in this era? And why is this so vitally important if we are to heal the divisions in our culture and ourselves, change our patterns of consumption, and reverse the fate of our earth? In three powerful essays, three influential writers and thinkers--Scott Russell Sanders, Peter Forbes and Kathleen Dean Moore--explore these questions, giving us new insights about the promise of land conservation in our present world. Through its deep examination of the value of land to our culture and our souls, this book becomes a meditation on reconciliation and restoration, love and loss, wholeness and innovation, fairness and community. It gives us new approaches and new hope to work to heal the great divisions and losses we see around us each day. The book also includes a Land and People Index which gives often startling statistics on the state of our world, such as the fact that America now has more malls than high schools. The index, a set of guidelines for setting ones highest values, and other tools give this reader an added dimension: as a practical and thought-provoking workbook for conservationists and social activists it offers ways to move

forward with more power to effect change. The First World War was an epic event of huge proportions that lasted over four years and involved the armies of more than twenty nations, resulting in 30 million casualties, including more than 8 million killed. Set against the backdrop of this massive carnage, *The Search for Negotiated Peace* is the gripping story of the events that moved high profile American and European citizens, particularly women, into the international peace movement. This small, transatlantic network put forth proposals for changing the international system of negotiation. They supported non-annexationist war aims and attempted to discredit nations' secret diplomacy, militarism and narrowly nationalistic practices. Instead, they wanted to develop a 'new diplomacy.' David Patterson skillfully develops the interactions of many of the notable leaders of the movement, including Jane Addams, Aletta Jacobs, and Rosika Schwimmer,

into an absorbing narrative that brings together the various strands of women's history, international diplomatic history, and peace history for the first time. *The Search for Negotiated Peace* is an essential read for anyone interested in the social history of World War I and the foundations of citizen activism today. A convenient method has been developed for determining the scavenging efficiency or the charging efficiency of two-stroke-cycle engines. The method consists of introducing a suitable tracer gas into the inlet air of the running engine and measuring chemically its concentration both in the inlet and exhaust gas. Monomethylamine CH_3NH_2 was found suitable for the purpose as it burns almost completely during combustion, whereas the "short-circuited" portion does not burn at all and can be determined quantitatively in the exhaust. The method was tested both on four-stroke and on two-stroke engines and is considered accurate within 1 percent. A "fascinating slice of rarely considered American history" (Booklist)—the story of Henry Ford and Thomas Edison—whose annual summer sojourns introduced the road trip to our culture and made the automobile an essential part of modern life. In 1914 Henry Ford and naturalist John Burroughs visited Thomas Edison in Florida and toured the Everglades. The following year Ford, Edison, and tire maker Harvey Firestone joined together on a summer camping trip and decided to call themselves the Vagabonds. They would continue their summer road trips until 1925, when they announced that their fame made it too difficult for them to carry on. Although the Vagabonds traveled with an entourage of chefs, butlers, and others, this elite fraternity also had a serious purpose: to examine the conditions of America's roadways and improve the practicality of automobile travel. Cars were unreliable and the roads were even worse. But newspaper coverage of these trips was extensive, and as cars and roads improved, the summer trip by automobile soon became a desired element of American life. *The Vagabonds* is "a portrait of America's burgeoning love affair with the

automobile" (NPR) but it also sheds light on the important relationship between the older Edison and the younger Ford, who once worked for the famous inventor. The road trips made the automobile ubiquitous and magnified Ford's reputation, even as Edison's diminished. The automobile would transform the American landscape, the American economy, and the American way of life and Guinn brings this seminal moment in history to vivid life. Historians have tended to point to John F. Kennedy's 1960 bid for the presidency as the first time a candidate relied extensively on public opinion polls to drive a campaign. Polling has come to define American politics, and is perhaps most clearly embodied in Bill Clinton, the post poll-driven president in history. Melvin G. Holli dismisses this notion, however, and reveals that presidential reliance on public opinion polls dates back to the New Deal Era, when Franklin Roosevelt employed a first-generation Finnish-American named Emil Hurja to conduct polls for this 1932 and 1936 presidential campaigns. Holli shows us how Hurja convinced the Democratic National Committee to allow him to apply the new science of polling FDR's presidential campaign of 1932. Roosevelt's triumph at the polls in that year and again in 1936, as well as the spectacular 1934 Democratic mid-term congressional victory was legendary. Holli restores Hurja to his rightful place in American history and politics, showing us that the Washington press corps were right on target when they dubbed Hurja the 'Wizard of Washington'. When an explosion rips through the home of Gulf War veteran Clarence Davenport, Secret Service Agent John Wallace and White House aide Molly Pemberton are certain that Davenport, the assassin who killed President Butler, had killed himself. President Silver, the former Education Secretary who became President when Davenport killed all other legal successors to the Presidency, informs the nation that the crime of the century has been solved and that the perpetrator is dead, only to have to admit, days later, that Davenport had escaped. National outrage at Davenport's

escape escalates, fueled by Senator Jeb Davies' political ambition and his hatred of Ben Silver. Davenport, the world's most sought after fugitive, with no other place to go, is recruited by Saudi expatriates opposed to the Royal Family and ends up in an Al Qaeda training camp where he devises another plan to kill President Silver and attack the United States. Silver tries to stave off the rising tide of impeachment and at the same time combat the increasing risk of a terrorist attack that will destroy the Presidency and fundamentally change the United States unless he can avoid impeachment and intercept the threat. "...timely as this evening's news..." --Melannie Lauers, Cape Cod Times(on After Kamisiyah) "...an intriguing insight..." --Mathew Call, Newton Tab (on After Kamisiyah) Jay Sand moves to a small city in Nebraska looking forward to his new job in the district attorney's office. He soon becomes the target of assassins and Sergeant Cindy Jackson is assigned to work out of his office and watch his back. They stumble onto a multiple homicide in progress and are caught up in the search for the killers. The pursuit takes them from a gun battle on the streets of Omaha to a jail break in Harrisburg as they stay one step ahead of organized crime and an intelligence spook gone bad. This is a story of contemporary fiction about two professional crime fighters, their families, their peers and their opponents. It is also about their failures and their successes.
