Secrets of Surrender Nov 16 2022 First he'll learn her most intimate secrets. Then he'll arouse her deepest passions. He's the lover she's been waiting for: the man who can rescue her from her wicked past—for a price—in Madeline Hunter's tale of sin, seduction, and irresistible, impossible love. He catches her eye across the dining room—a handsome stranger who stands out among the lewd noblemen and bawdy painted women. But their worlds are about to collide in a way Roselyn Longworth could never have imagined. For before the night is out, she will be auctioned off to the highest bidder...and Kyle Bradwell will lead her from one kind of hell to another. Yet from the moment he wins her, Kyle treats Rose with a gentleness she hasn't known since a family scandal destroyed her reputation. And when she finally learns what is really driving Kyle, it's too late. For Rose has fallen for the man who knows her most intimate secrets. Now he has stunned her with a proposal of marriage—the first step in a seduction that will demand nothing less than her complete surrender...

Hiroshima Sep 14 2022 The US decision to drop an atomic bomb on the Japanese city of Hiroshima on 6 August 1945 remains one of the most controversial events of the twentieth century. However, the controversy over the rights and wrongs of dropping the bomb has tended to obscure a number of fundamental and sobering truths about the development of this fearsome weapon. The principle of killing thousands of enemy civilians from the air was already well established by 1945 and had been practised on numerous occasions by both sides during the Second World War. Moreover, the bomb dropped on Hiroshima was conceived and built by an international community of scientists, not just by the Americans. Other nations (including Japan and Germany) were also developing atomic bombs in the first half of the 1940s, albeit haphazardly. Indeed, it is difficult to imagine any combatant nation foregoing the use of the bomb during the war had it been able to obtain one. The international team of scientists organized by the Americans just got there first. As this fascinating new history shows, the bomb dropped by a US pilot that hot August morning in 1945 was in many ways the world's offspring, in both a technological and a moral sense. And it was the world that would have to face its consequences, strategically, diplomatically, and culturally, in the years ahead.

Problems of Editing Feb 19 2023 This collection of essays attempts to address some problems of editorial theory and practice which its contributors have either encountered in their own work as practicing editors or as critical users of English editions. It also discusses more general questions, i.e. linguistic problems of editing, the problems of editing bilingual editions or school editions and the difficult economics of scholarly editions today. There are also essays on editing performance poetry, the waning impact of analytical bibliography, the role of teaching and learning editing as well as on the situation of editorial theory and practice among Anglicists in Germany. Several of the essays in this volume began their lives as papers for a workshop on »Editorial Problems« held at the annual meeting of the German 'Anglistentag' in Gießen in September 1997.
